

A BOOK OF THE NAMES OF ALL

Parishes, Market Towns, Villages, Hamblers, and
Smallest Places, in
ENGLAND and WALES.

Alphabetically set down, as they be in every Shire. With
the Names of the Hundreds in which they are, and how many
Towns there are in every Hundred.

So that naming any Town or place in *England and Wales*, you may
presently in the Alphabet find it, and know in what Shire and Hundred it
is, and so know the distance from it to the Shire Town, and in the large
Table for Shires in *England*, how far to *London*, or from it, to any other Town
in *England*.

Together with a Catalogue of the Market Towns, Castles, Parish
Churches, Rivers, Forrests and Parks; and also the Length, Breadth and Cir-
cumference of every particular Shire.

A work very necessary

For Travellers, Quartermasters, Gatherers of Breefs, Strangers, Car-
riers, and Messengers with Letters, and all others that know the name of
the place, but can neither tell where it is, nor how to go unto it.

If you would find out any Shire, note that the Shires lie Alphe-
betically, beginning with *Bark-shire*, and so following
accordingly.

Summa cuiusque virtus pulcherima merces.

London, Printed by S. S. for John Garret, at his Shop as you go
up the Stairs of the Royal Exchange in Cornhill: Where is also sold all
sorts of large and small Maps of the World, or any particular part
thereof, with variety of Prospect Cities. 1677.

1-6

My dear
Mother
I have been thinking
of you very much lately

and wondering how
you are getting on
I hope you are well
and happy

John Frestlove

42 Shires

25 641 182 972 554 956 31 68 181 835 Cst

The use of all the ensuing Tables.

TO know the distance between any two Cities or Towns in any of these Tables, seek the places desired in the upper and side Catalogues of Towns, and direct your eye from either place between the lines both from above and from the side, and where the lines meet in square you shall find the number of miles. *For Example*; If you would know how far *Lincoln* is from *Exeter*, look in the Card of shire Towns, and find *Lincoln* in the side, and carry your eye directly from thence between the lines untill it come under *Exeter*, and where they meet in square you shall find 178, which is the distance of miles.

If you find any Town in the side which will not extend to make a square with the desired Town above, then look for the Town which you find in the side in the upper part, and the upper part in the side. *For Example*, If you desire to know the distance between *Gloucester* and *Oxford*, if you look *Gloucester* in the side, you cannot bring *Oxford* in a square with *Gloucester*, but if you look *Gloucester* above and *Oxford* in the side, you shall find the square and the distance 35 miles, and so of the other ensuing Tables.

To know whether you are to travell East, West, North or South, from the place where you are, to the place where you intend to goe, and through what shires you must pass.

Look in the small Mapp of England, placed before the great Table of shire Towns, and draw a streight line from the next shire Town lying in your way to that shire Town which is next the place whither you desire to goe, and you shall immediatly see whether your Journey be East, West, North or South; and what shires the line brings you through, those shires you must pass. *As for Examples*; If you would travell from *London* to *Torke*, you will perceive by the mapp that it lieth North from *London*, then draw a line or carry your eye straight from *London* to *Torke*, and you shall find the way lyeth through *Middlesex*, *Hartford* shire, *Huntington* shire, *Northampton* shire, *Lincoln* shire, *Nottingham* shire, and *Torke* shire; and so for any other place.

Again to know what market Towns lie in your way, which way soever you travell.

When you have seen in the generall Mapp what Shires you are to pass through, observe whether you must pass through the middle or the skirts of each Shire, then turn to the Tables of those Shires, and at the foot of each of them you shall have a Mapp, wherein the Towns are signified as they lie in every Shire by the first letter of every Town, and if you must pass through the middle of the Shire, then the letters about the middle of the Mapp declare the Towns by which you must go, but if through the skirts of the Shire, then the letters in the skirts of the Mapp are your direction.

W. H. Gage

Handwritten cursive script, likely a signature or decorative flourish, spanning multiple lines. The text is heavily stylized and difficult to decipher, but appears to be a single continuous piece of writing.

* Anima est immortali.

Sparitus est
